PROFESSIONAL SUMMARY

Knowledge management, technical writing and automation specialist with 10+ years of experience across operations, content systems, documentation and process improvement in global organisations. Experienced in designing knowledge architectures, producing user-facing and internal technical documentation, and building workflow automations using Python, FastAPI, APIs, webhooks, Notion and low-code platforms. Strong record of reducing manual work, improving information quality and enabling scalable, asynchronous operations across distributed teams.

CORE SKILLS

Knowledge Management & Documentation: Knowledge Management, Information Architecture, Confluence, Notion, Technical Writing, SOP Development, Process Documentation, Help Centre Content, Content Governance, Documentation Systems, Single Sourcing
Automation & Systems: Python, FastAPI, REST APIs, Webhooks, n8n, Make, Zapier, Railway, Google Apps Script, JavaScript, Workflow Automation, Process Automation, AI-Assisted Evaluation
Documentation Technologies: HTML, XML, Markdown, CSS, Git, XMetaL, Adobe RoboHelp, MadCap Flare, Document360, Paligo
Operations & Platforms: Salesforce, Jira, Linear, Stakeholder Management, Content Operations, Training & Onboarding
Languages: Arabic (Native), English (Fluent)

PROFESSIONAL EXPERIENCE

Technical Writer Jan 2026 - Present
Mobile Tornado | United Kingdom, Remote | Client engagement via Palm Outsourcing
Produce and maintain technical and user-facing documentation for enterprise push-to-talk products, using Confluence and HTML-based documentation workflows.

KEY RESPONSIBILITIES

- Improve information architecture, navigation, consistency, content reuse and single-sourcing across documentation sets.
- Collaborate with product and technical stakeholders to validate software behaviour, UI terminology and documentation requirements.
- Develop user-facing documentation, UI copy, onboarding guidance and video tutorials supporting product usability and adoption.

ACHIEVEMENTS

- Rewrote and restructured the 89-page Instant Talk Android Client User Guide into a standards-compliant partner reference.
- Delivered a guide adopted as the canonical reference across Mobile Tornado's international partner network.

Tech Lead, Automation & Systems (Part-time / Freelance) Sep 2025 - Jun 2026
Palm Outsourcing | United Kingdom, Remote
Led recruitment automation, internal systems and knowledge enablement supporting high-volume candidate operations and a pool of approximately 12,000 records.

KEY RESPONSIBILITIES

- Built and operated an end-to-end recruiting workflow integrating Notion, Postmark, Twilio WhatsApp, Hireflix, Slack and Railway.
- Built a FastAPI-based candidate-role matching engine with structured scoring, AI-assisted transcript evaluation and deterministic data integrity controls.
- Engineered resilient workflows with rate limiting, retries, backoff, deduplication, monitoring and failure recovery.
- Owned Notion architecture, database design, permissions and access governance, and produced SOPs supporting operational continuity.

ACHIEVEMENTS

- Cut candidate pooling and shortlisting time from ~1 week to ~45 minutes.
- Reduced WhatsApp screening reminder delivery from 3 days to under 1 minute.
- Reduced Postmark bounce rate to below 1% through automated validation, throttling and error classification.
- Scaled recruitment operations without increasing operational headcount.

Ecommerce Product Analyst

Oct 2024 - Dec 2025

Lawazem | Saudi Arabia, Remote

Managed marketplace content quality, catalogue structure, onboarding workflows and operational documentation across Arabic and English content.

KEY RESPONSIBILITIES

- Established product naming and listing standards to reduce catalogue inconsistency.
- Created SOPs and onboarding documentation supporting merchant activation, sales and account management workflows.
- Reported directly to the CEO on marketplace performance, product improvements and merchant activity.

ACHIEVEMENTS

- Improved more than 2,500 product listings for accuracy, consistency, localisation and discoverability.
- Built a product name generator in Google Apps Script and JavaScript that processed 3,000+ products in its first month.
- Supported the launch of 2 new product categories and redesigned labels across 10+ categories.

Content Analyst

Sep 2020 - Sep 2024

Amazon | Cairo, Egypt

Managed knowledge content, process documentation and automation supporting Amazon Middle East customer service operations.

KEY RESPONSIBILITIES

- Developed and maintained an automated intake and triage workflow for Knowledge Management requests.
- Created and maintained customer-facing help content, internal policy pages, process documentation and associate communication templates.
- Improved content accessibility, localisation, usability and self-service through continuous improvement initiatives.
- Collaborated with technical, business, Public Relations and Legal teams on policies, launches and operational changes.

ACHIEVEMENTS

- Reduced L2/L3 Knowledge Management request triage SLA from 1 hour to 5 minutes through automation.
- Led the launch of prepaid mobile recharge support content in the Middle East.

Content Program Specialist

Nov 2017 - Jun 2020

Uber | Cairo, Egypt

Managed EMEA content operations across Confluence and other knowledge systems, covering SOPs, localisation, policy updates, product launches and process improvement.

KEY RESPONSIBILITIES

- Created internal operational documentation and external support content across knowledge bases and help centres.
- Worked cross-functionally with product, growth, customer experience, operations and technical teams across EMEA.
- Used SQL and spreadsheets for analysis and reporting.

ACHIEVEMENTS

- Co-led an EMEA knowledge base review covering the top 50 issue types, achieving 100% completion with 0% content defects.
- Improved driver satisfaction in Sub-Saharan Africa from 20% to 70% through content and Six Sigma process improvement.
- Co-led an SSA phone-support content launch with less than 2% contact defects.
- Led a COVID partner outreach campaign involving 4,000 calls with 80% satisfaction.

Community Operations Specialist

Jun 2016 - Nov 2017

Uber | Cairo, Egypt

Supported launch operations for Uber's Cairo Center of Excellence serving Sub-Saharan African markets.

KEY RESPONSIBILITIES

- Resolved partner enquiries, operational issues and escalations while identifying opportunities for process improvement.

ACHIEVEMENTS

- Led a proof of concept for driver payments with EMEA Partner Payments, Trade & Compliance and SSA Central Operations.
- Processed and resolved 10,000 driver payments before Christmas Eve, supporting continuity of service during the holiday period.

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Language & Simultaneous Interpretation

2012 - 2016

Cairo Higher Institutes | Cairo, Egypt

- Lean Six Sigma Yellow Belt, MoreSteam University, 2020
- Fundamentals of Project Management, MoreSteam University, 2020
