Automation & Systems: Python, FastAPI, REST APIs, Webhooks, n8n, Make, Zapier, Railway, Google Apps Script, JavaScript, Workflow Automation, Process Automation, AI-Assisted Evaluation

Documentation Technologies: HTML, XML, Markdown, CSS, Git, XMetaL, Adobe RoboHelp, MadCap Flare, Document360, Paligo

Operations & Platforms: Salesforce, Jira, Linear, Stakeholder Management, Content Operations, Training & Onboarding

Languages: Arabic (Native), English (Fluent)

PROFESSIONAL EXPERIENCE

Tech Lead, Automation & Systems (Part-time / Freelance)

Sep 2025 - Present

Palm Outsourcing | United Kingdom, Remote

- Lead recruitment automation and operational systems supporting high-volume screening and a candidate pool of approximately 12,000 records.
- Built and operate an end-to-end recruiting workflow integrating Notion, Postmark, Twilio WhatsApp, Hireflix, Slack and Railway.
- Built a FastAPI-based candidate-role matching engine with structured scoring, AI-assisted transcript evaluation and deterministic data integrity controls.
- Engineered resilient messaging and data workflows with rate limiting, retries, backoff, deduplication, monitoring and failure recovery.
- Own Notion workspace architecture, database design, permissions and access governance, and produce SOPs supporting operational continuity.
- Reduced candidate pooling and shortlisting time per role from approximately 1 week to 45 minutes.
- Reduced WhatsApp screening reminder delivery from 3 days to under 1 minute through event-driven automation.
- Reduced Postmark bounce rate to below 1% through validation, throttling and error classification while scaling operations without additional headcount.

Technical Writer

Jan 2026 - Present

Mobile Tornado | United Kingdom, Remote | Client engagement via Palm Outsourcing

- Produce and maintain customer-facing and technical documentation for enterprise push-to-talk software, using Confluence and HTML-based documentation workflows.
- Rewrote and restructured the 89-page Instant Talk Android Client User Guide into a clearer, standards-compliant partner reference adopted across Mobile Tornado's international partner network.
- Improve information architecture, navigation, consistency, content reuse and single-sourcing across documentation sets.
- Collaborate with product and technical stakeholders to validate software behaviour, UI terminology and documentation requirements.
- Develop user-facing documentation, UI copy, onboarding guidance and video tutorials supporting product usability and adoption.

Ecommerce Product Analyst

Oct 2024 - Dec 2025

Lawazem | Saudi Arabia, Remote

- Managed marketplace content quality, catalogue structure, onboarding workflows and operational documentation across Arabic and English content.
- Reviewed and improved more than 2,500 product listings for accuracy, consistency, localisation and discoverability.
- Developed a product name generator using Google Apps Script and JavaScript that processed more than 3,000 products in its first month.
- Established product naming and listing standards and collaborated on the launch of 2 new categories and redesigned labels across 10+ categories.
- Created SOPs and onboarding documentation supporting merchant activation, sales and account management workflows.
- Reported directly to the CEO on marketplace performance, product improvements and merchant activity.

Content Analyst

Sep 2020 - Sep 2024

Amazon | Cairo, Egypt

- Managed knowledge content, process documentation and automation supporting Amazon Middle East customer service operations.
- Developed and maintained an automated intake and triage workflow for Knowledge Management requests, reducing L2/L3 triage SLA from 1 hour to 5 minutes.
- Created and maintained customer-facing help content, internal policy pages, process documentation and associate communication templates.
- Improved content accessibility, localisation, usability and self-service through continuous improvement initiatives.
- Collaborated with technical, business, Public Relations and Legal teams on policies, launches and operational changes.
- Led the launch of prepaid mobile recharge support content in the Middle East and supported onboarding and knowledge transfer for new team members.

Content Program Specialist

Nov 2017 - Jun 2020

Uber | Cairo, Egypt

- Managed EMEA content operations across Confluence and other knowledge systems, covering SOPs, localisation, policy updates, product launches and process improvement.
- Created internal operational documentation and external support content across knowledge bases and help centres.
- Worked cross-functionally with product, growth, customer experience, operations and technical teams across EMEA.
- Co-led an EMEA knowledge base review covering the top 50 issue types, achieving 100% completion with 0% content defects.
- Improved driver satisfaction in Sub-Saharan Africa from 20% to 70% through content and Six Sigma process improvement, and co-led an SSA phone-support content launch with less than 2% contact defects.
- Used SQL and spreadsheets for analysis and reporting, and led a COVID partner outreach campaign involving 4,000 calls with 80% satisfaction.

Community Operations Specialist

Jun 2016 - Nov 2017

Uber | Cairo, Egypt

- Supported launch operations for Uber's Cairo Center of Excellence serving Sub-Saharan African markets.
- Resolved partner enquiries, operational issues and escalations while identifying opportunities for process improvement.
- Led a proof of concept for driver payments with EMEA Partner Payments, Trade & Compliance and SSA Central Operations, processing and resolving 10,000 payments before Christmas Eve.

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Language & Simultaneous Interpretation

Cairo Higher Institutes | Cairo, Egypt | 2012 - 2016

- Lean Six Sigma Yellow Belt, MoreSteam University, 2020
- Fundamentals of Project Management, MoreSteam University, 2020
